SUMMARY

Full Stack Developer and SDE intern at KabadCart with hands-on experience in Next.js, React Native, TypeScript and PostgreSQL. Turns Figma designs into working web and mobile apps connected to real APIs. Runner-Up at Hacknovate 7.0 and 3rd place at the Geospatial Hackathon.

EXPERIENCE

SDE Intern, KabadCart (Xysma Recylotech Solutions Pvt Ltd)

May 2026 - Present

- Built the customer-facing mobile app in React Native from Figma designs, integrating APIs into every screen so the whole flow works end to end. The app is live on the Google Play Store.
- Built the admin CRM dashboard in Next.js from Figma designs and connected it to the backend APIs to manage the company's apps and website.
- Fix production bugs and ship new features across the mobile app and the dashboard.

PROJECTS

CampusFund: Blockchain Campus Crowdfunding Platform

Apr 2026 - Present

Algorand, Next.js

- Architected a per-campaign smart contract model on Algorand TestNet, deploying an isolated contract at campaign creation with donation, invoice verification, fund claim and refund methods.
- Implemented a donor-pull refund model to stay within Algorand's 256 inner transaction limit.
- Gated fund claims behind GST invoice verification using Groq Vision OCR and the GSTIN Check API.
- Built a UPI to ALGO donation bridge with Razorpay and throwaway Algorand keypairs so non-crypto users can donate; secured auth with Lucia Auth and Arctic.

MediNutri: AI Health & Nutrition Tracking App

Mar 2026 - May 2026

Full-stack, deployed on Vercel

- Built a health platform with AI diagnostics, a streaming chatbot and e-commerce, with separate role-based dashboards for clinics and patients.
- Integrated Razorpay end to end: cart, checkout, order confirmation and transaction verification with status-aware UI states.

Land Record Digitization System

Jan 2026 - Feb 2026

GeoJSON parcel reconciliation platform

- Linked GeoJSON parcel geometries to PostgreSQL ownership records and flagged map-versus-ownership inconsistencies using configurable area mismatch thresholds across hundreds of parcels.
- Built an interactive Leaflet map with parcel search, audit trail and inline editing; normalized plot_id types to fix cross-source mismatches.
- Fixed a bulk upload deleteMany bug that wiped existing records on image-only uploads.

EDUCATION

B.Tech, Computer Science & Engineering, Arya College of Engineering & IT

2025 - 2029

SKILLS

Languages: JavaScript, TypeScript, HTML, CSS

Frontend and mobile: React, Next.js, React Native, Tailwind CSS, Angular, AngularJS

Backend and data: Node.js, PostgreSQL, MongoDB, MySQL, Prisma ORM, Drizzle

Tools: Git, GitHub, Razorpay, Cloudinary

AWARDS

- Runner-Up, Hacknovate 7.0 (Algorand Blockchain Track), for CampusFund.
- 3rd Place, Geospatial Hackathon, Arya College of Engineering & IT, for Land Record Digitization System.

TRAINING

Full Stack Web Development (self-taught)

Apr 2019 - Nov 2020

Built websites with React.js, JavaScript, Tailwind CSS and Next.js from documentation and tutorials.
